

# EVOLVE YOUR SAP THROUGH CONTINUOUS DELIVERY AND INNOVATION

The SAP® product suite is evolving to enable the Intelligent Enterprise ... IT must evolve to enable a Renewable Enterprise

*Organizations need to be able to continuously develop and innovate to take advantage of this evolution – making the most of their SAP investments and bringing true value to their business.*

## But what are the imperatives for becoming an SAP S/4HANA-enabled Intelligent Enterprise?

 <p><b>A comprehensive LANDSCAPE STRATEGY</b></p> <p>Implementing a best-practice architecture to ensure integrity and consistency – effectively managing different components within a hybrid Cloud SAP landscape</p>	 <p><b>A solid DOCUMENTATION STRATEGY</b></p> <p>Ensuring stability in a mode of continuous delivery</p>	 <p><b>An actionable ENABLEMENT STRATEGY</b></p> <p>Facilitating the right level of education and easy access to support in carrying the user community along</p>	 <p><b>Resilient BUSINESS ASSURANCE</b></p> <p>Applying Quality and Site Reliability Engineering to maintain estate stability and resilience during continuous delivery</p>	 <p><b>Harnessing EFFECTIVE TOOLING</b></p> <p>Driving a fabric-based approach to tooling that exploits best-of-breed assets and accelerators</p>
---	---	--	---	--

## And how can you take this forward right now?

<p><b>Make the most of your SAP S/4HANA transformation project</b></p> <p><b>Enhance end-user experience and adoption:</b></p> <p>Design new IT AND business processes, and explore options for new tooling</p> <p><b>Ensure your rollout team stays focused on new deployments and their adoption:</b></p> <p>Plan early for an interim support function that expands as new functions come into play</p>		<p><b>Exploit your current SAP investment to the fullest</b></p> <p><b>Simplify your core with our “clean the core” initiative:</b></p> <p>Accelerate your development path – and improve the stability and resilience of your overlying business processes</p> <p><b>Optimize your processes:</b></p> <p>Streamline, reduce costs and accelerate throughput with process discovery and mining tools</p> <p><b>Unlock the value of Agile/DevOps/PODs:</b></p> <p>Achieve better team development and support team alignment, introduce newer tooling, and ensure cost effectiveness and efficiency with incremental improvements in the way your IT works</p>
